

# AVerVision M5

USB Distance Learning Visualizer  
(Document Camera)

## Compatible Applications

Zoom, Skype, Google Meet™, Microsoft® Teams, Adobe® Connect™, Cisco WebEx®, GoToMeeting™, and many more.

# DISTANCE LEARNING YOUR WAY

The AVerVision M5 is a USB visualizer specially made for distance learning and remote teaching. Its foldable, grab-and-go design lets you start online courses in mere moments. Simply adjust the camera head to self-view for a tutoring session, and then quickly find the best angle for demonstrating materials. Add in AVerTouch software's newest AI functions, and you can maximize teaching engagement even when livestreaming.

For Distance Learning

For Hybrid Classrooms

3264 x 2448 (8M) Output Resolution

8 MP

16X Digital Zoom

A3 Shooting Area

USB Plug & Play

Super Resolution AI

Curve Flattening AI

1 Year Warranty

## Born for Distance Learning

Weighing only 0.78 kg, the M5 is always ready for teaching at home, in class, or on the go. It works perfectly with any live-video platform thanks to its standard plug-and-play function. The ultimate portability of the M5 helps make online education a pleasant journey when you're teaching from home.

## Ideal for Hybrid Classrooms

The M5 is a gorgeous yet practical visualizer optimized for hybrid classroom usage. Just set it up to livestream in-class lectures for students who can't be physically present. Also, you can save recorded clips for offline review.

## Shocking Image Quality

When students enter the online classroom, image quality is the first thing they notice. The M5's 8M image quality makes a lasting first impression! With AVer's renowned video processing technology, students always feel like they're in the front row while studying from home!

## Beyond A3 Shooting Area

When capturing materials, viewing-angle flexibility matters most. The M5's 8-megapixel, 16X digital zoom camera enhances your ability to visualize within a larger than A3-size area. Far-site students will never again miss out on impactful details.

## Exclusive AI Functions

AVer's in-house AI algorithm automatically adjusts images for optimal viewing. Super Resolution and Curve Flattening AI functions ensure constant image quality during remote teaching, giving you flexibility for showing materials.

## Free AVerTouch for Enhancing Remote Teaching

AVerTouch is ultra-powerful software designed exclusively for AVer visualizers. One touch connects your visualizer with mobile devices for content sharing, and you can sync to the cloud to automatically save annotated, captured, and recorded files. Use AVerTouch to engage with students whether they're online or offline.

With the M5, you can display...

-  Film slides / Filmstrips
-  Real-time movements
-  Documents
-  3D objects
-  X-rays

Show images to your audience through...

-  Interactive flat panel
-  TV monitor
-  Projection screen
-  Digital monitor
